- IV. Preparation of Sprint 2 Deliverables

#### **8.1 Progress Reports**

##### **Fred and Susheel**

- Running initial field test and collating a set of test data for the webapp, modified some code in the back- and front-end
- Sprint 2 minutes and document

##### **Bob**

- Working on webapp, authentication - routes in Flask to flow from landing page -> authentication -> index page
- Issues working on CSU account using a UWA tenant, will get Jim to complete the authentication process
- Working on Sprint 2 / 3 stories and document
- Will get repo ownership once Github Pro is activated

##### **Lilee**

- Coding on start search and end search route collecting data as a search progresses
- Working on Sprint 2 / 3 stories and document

##### **Jack**

- Finished GPX data work, current implementation of converting a single base stations data into a single GPX file (instead of entire search)
- Helping with front-end - directory structure reorganisation
- Animated visual representations of web app functions

#### **8.2 Discussion Points**

- Katrina absence - what does that mean for us in Sprint 2 workload: Email Micheal
  - **Fred**
    - Will email Michael, keeping it general not asking for anything, just asking for considerations

- Mentor Meeting - the 16th, next week would be the last time to book in mentor meeting
  - **Bob**
    - Has emailed the mentor about setting up a meeting this week, no response for 5 days
  - **Jack**
    - We will organise it this week or next week, but it's not the end of the world if we do end up missing the meeting for any reason - we have some solid advice to go on already
