

Dear Jim Catelli,

As part of the CITS3200 'Professional Computing' unit at The University of Western Australia, our group has been selected to work on the '**Map Meshtastic or Lora Devices**' project which you have graciously provided for us.

Firstly, we would like to express our gratitude and excitement to be able to work on a project of this nature.

Is there a time in which we could discuss the scope of this project, as well as your expectations? Our group will be meeting every **Wednesday at 4:00pm** to discuss our progress, but we would be more than happy to adjust times to better accommodate your schedule.

Michael Wise, the unit co-ordinator, has suggested that we use Microsoft Teams to organise meetings with our project contacts - would this be suitable for you? Otherwise, would you have a preferred means of contact for the duration of the semester?

As part of the unit, we also have a number of obligations and deadlines which we will need to meet:

- **12/AUG/2024** - Due date for Deliverable 1
- **16/SEP/2024** - Due date for Deliverable 2
- **14/OCT/2024** - Due date for Final Deliverable

Thank you once again for providing us the opportunity to work on this project.

Kind Regards,

Jack Donaghy
Fred Leman
Susheel Utagi
Bob Beashel
Lilee Hammond
Katrina Yan
